Index of Subjects

Abomasal infusions, effect on ammonia and insulin, 549
effect on milk yield and composition, 29, 423
Acetoin, production by *Lactococcus lactis*, effect of temperature, 123
α_2-, β_2-Adrenoceptors, bulls, milkability of daughters, 567
Ammonia, detoxification, effect of propionate, 549

Bifidobacteria, milk fermented by (review), 151
Biofilms, bacterial, in dairy processing lines, 509
Buttermilk ultrafiltration, effect of pH, 441

Casein(s), inhibition of lymphocyte proliferation, 339
in goats' milk, change during lactation, 431
proteolysis, detection in cheese, 297
α-Casein, peptone, calmodulin-binding peptides isolated from, 587
α_{s1}-Casein, bovine, fragment 140–149, antibodies, monospecificity, 83
ovine, primary structure and genetic variants, 281
β-Casein, bovine, monoclonal antibodies, use in ELISA, 655
ovine, heterogeneity, 89
κ-Casein, peptide 98–111, interaction with chymosin and pepsin, 451
variants, effect on heat stability of milk, 593
κ-Caseinoglycopeptides, inhibition of lymphocyte proliferation, 349
Cheddar cheese, water-soluble peptides, 629
production, recombinant chymosin and calf rennet, 673
influence of season and diet, 529
Cheese(s), comparative study of peptidolysis, 543
detection of proteolysis in, 297
processed, water holding capacity, protein interactions, 479
French raw milk, screening for *Leuconostoc*, 521
Cheese whey, fibroblast growth factors in, 501
Cholesterol oxides, in dairy products, 101
Chymosin *see also* **Rennet**
bovine, interaction with κ-casein peptide 98–111, 451
recombinant, in Cheddar cheese production, 673
Cortisol, effects of machine milking and suckling, 249

Dairy products, cholesterol oxide content, 101
Diacetyl, production by *Lactococcus lactis*, effect of temperature, 123

Escherichia coli, killing by neutrophil leucocytes, 331

Gels, development in whey protein concentrate solutions, 469
formation, acid–heat-induced in skim milk, 491
heat-induced, concentrated skim milk, 257
Goats, lactating, treatment with bovine somatotropin, 237
onset of calcium secretion, 539

Lactobacilli, proteolytic activity and enzymes in, 601, 611
use in low-fat cheese ripening, 131
Lactococci, proteolytic enzymes in, 611
Lactococcus lactis subsp. *cremoris* LC330, exopolysaccharide production, 621
Lactococcus lactis subsp. *lactis* biovar. *diacetilactis*, diacetyl and acetoin production, 123
Lactogenesis, goat, calcium secretion, 539
β-Lactoglobulin, ovine, gene expression, 321
variants, effect on heat stability of milk, 593
Lactones, formation in buffalo milk on storage, 645
Leucocytes, polymorphonuclear neutrophil, effect on *Esch. coli*, 331
Lymphocytes, effect on proliferation, by bovine milk caseins, 339
by bovine κ-caseinoglycopeptides, 349

Machine milking, effects on oxytocin and cortisol concentrations, 249
interruption, effects on intramammary pressure, milking, 559
Mammary gland, *see also* **Udder**
metabolism in the sow, 189, 207, 221
blood flow and nutrient uptake in the cow, 405
Mastitis, heifer, staphylococci, 51
patterns and control measures, 39
and proteinase activity, 61
Microfiltration, effect of whey pretreatment, 269
Milk, bovine, detection in caprine dairy products, 83
detection in caprine and ovine dairy products, 655
heat stability, 593
plasminogen activity, 115
skim, heat-induced gelation, 257
buffalo, lactone formation during storage, 645
goats', changes in casein composition in lactation, 431
Milk yield, and abomasal infusions, 29, 423

***N*-acetylgalactosamine**, in raw milk, 147
***N*-acetyl-β-glucosaminidase**, activity in bovine milk, 369
Neutrase, use in low-fat cheese ripening, 131
Nutrients, energy and nitrogen utilization, 15
uptake in the bovine mammary gland, 405

Oxytocin, effects of machine milking and suckling, 249

Pasteurization, deposit formation in heat exchanger, 641
Pepsin, porcine, interaction with κ-casein peptide 98–111, 451

Peptides, calmodulin-binding, from α-casein peptone, 587
water-soluble, Cheddar cheese, 629
Plasminogen activator, in bovine milk, 115
effect of lactation stage and somatic cell count, 141
Propionate, abomasal infusions, effect on ammonia and insulin, 549
Propionibacterium freudenreichii subsp. *shermanii*, proline-specific activities, 661
Proteinase activity, inhibition in mastitic milk, 61

Rennet, Cheddar cheese production, comparison with recombinant chymosin, 673
milk coagulation, effect of monovalent cations, 667

Somatic cell counts, effect of mordant factors, 373
Somatotropin, bovine, treatment of lactating goats, 237
Staphylococci, heifer mastitis, 51
Staphylococcus aureus, isolation and cow characteristics, 69
products, effects on myoepithelial cells, 577
Streptococci, infection of the bovine teat canal, 395
Suckling, effects on oxytoxin and cortisol concentrations, 249

Teat canal, bovine, streptococcal infection, 395

Udder, *see also* **Mammary gland, Teat canal**
health, and pulsator characteristics, 1
Ultrafiltration, whey and buttermilk, effect of pH, 441

Whey, pretreatment, effects on microfiltration 269
protein, immunomodulatory effects in mice, 359
polymorphism, 311
protein concentrate solution, gel development, 469
ultrafiltration, effect of pH, 441
